

Automatic washing machine

Robottina
2000

Motorized version
with Inverter

Pneumatic Version

The Robottina 2000 is an efficient completely automatic unit for cleaning all turntables, conveyor belts or other moving systems .

It is available in both motorised version with inverter and pneumatic version .

The electric version includes inverter motor control and proximity sensors to regulate travel .

The pneumatic version operates by compressed air and, thanks to the absence of electrical parts, is extremely reliable and safe in all places where electricity cannot be used .

To operate, just connect the washing head to a medium pressure water pumping system .

The Robottina 2000 can be quickly installed directly on the head of the turntable structure where it cleans the belt surface with surgical precision, relieving the operator of often repetitive, timetaking and tedious operations .

The carriage assembly carrying the washing nozzles runs at a speed of more than 1 m/s, exerting a truly remarkable cleaning effect on the dirty surface, with very low water consumption compared to classical fixed bar systems which use many nozzles with exaggerated water consumption .

AVAILABLE CONFIGURATION

CODE	MODELL	WASHABLE AREA (mm)	SCROLL SPEED	POWER (W)	VOLTAGE (Volt)	WEIGHT (Kg)	DIMENSIONS L x H x P (mm)
85300	Motorized	1000	Regolabile	220	230	30	1300 x 300 x 470
85100	Pneumatic	1000	Regolabile	-	-	30	1300 x 300 x 470

TECHNICAL DETAILS (Electric version)

- Low voltage controls.
- Cleaning of any tape widths up to 100 cm (**different widths on demand**)
- Electric motor 230 volt with low consumption (only 120 watt)
- IP65 Watertight electric control
- Adjustable scroll speed .
- Extremely smooth and quite operation
- Stainless steel hold bracket
- N. 01 nozzle to assure the maximun clean without operators
- Possibility to use more additional nozzles or rotating nozzles (**Optional**)
- Control Inverter inserito on the electric control panel to adjust the scroll speed
- Connection by s/s quick coupling for any h.p. or medium pressure hose

TECHNICAL DETAILS (Compressed air version)

- Cleaning of any tape widths up to 100 cm (different widths on demand)
- Compressed air moving sistem
- Adjustable scroll speed
- Extremely smooth and quite operation
- Stainless steel hold bracket
- N. 01 nozzle to assure the maximun clean without operators
- Possibility to use more additional nozzles or rotating nozzles (**Optional**)
- Connection by s/s quick coupling for any h.p. or medium pressure hose
- Easy adjustment of the stroke by pneumatic switch.
